Pune, India

“

A frontend web developer with a strong foundation in HTML, CSS, JS (ES6+), React.js, Node.js, with ability to quickly learn new technologies. Capable in translating design concepts into functional code along with performance optimisation and debugging. With a focus on organised, maintainable and scalable coding practices with a brief experience in frontend system design planning. Seeking to grow and contribute further in a progressive environment.

WORK EXPERIENCE

- **Systems Engineer** Nov 2022 – July 2024
Infosys, Pune
 - Collaborated with clients and functional consultants to analyse requirements translating them into robust and interactive ABAP reports.
 - Streamlined existing reporting process by optimising backend and database queries, resulting in faster report generation and reduced database load.
 - Incorporated complex business rules into reports, ensuring comprehensive and accurate data inputs and outputs.

- **Frontend Intern** Sept 2022 – Oct 2022
Renocrew Solutions, Remote
 - Performed assigned tasks that include developing SPAs using HTML, CSS, JS and using sweet-alert package for further styling.
 - Integration of minor upgrades in these SPAs on GitHub.
 - Understanding the problem statement and designing solution, further developing the code in Python.
 - Conducting unit tests using Python unittest framework.

PROJECTS

- **Full-Stack Wellness & Booking Platform | [Link](#)**
Built a scalable yoga booking application with **Next.js 16** and **MongoDB**, featuring role-based access, real-time class management, and secure Razorpay integration.
 1. **Core Stack:** Architected a high-performance app using Next.js 16, React, and TypeScript with Tailwind CSS for responsive design.
 2. **Data Modeling:** Designed a robust MongoDB schema with Prisma ORM to manage complex relationships between users, classes, and bookings.
 3. **Secure Auth:** Implemented custom JWT authentication with strict Role-Based Access Control (RBAC) for admins, trainers, and students.
 4. **Trainer Dashboard:** Built a comprehensive dashboard for trainers to create classes, manage schedules, and track capacity in real-time.
 5. **Payments:** Integrated Razorpay for seamless INR transactions, handling order creation and webhook verification securely.
 6. **Input Validation:** Enforced data integrity using Zod schemas and React Hook Form across all application inputs.

EDUCATION

- **B.E COMPUTER** 2018-22
CGPA : 8.99
COLLEGE : SSBT's COET, Jalgaon

Technical Skills

- Responsive Web Development
- State Management
- Version Control
- API Testing
- Unit Testing
- Debugging

Programming Languages

C++, HTML, CSS, JAVA, JavaScript, TypeScript, Python

Frameworks & Libraries

Next.js, React, Node.js, Express.js, Jest, Redux Toolkit, Tailwind CSS, Bootstrap, Prisma ORM

Developer Tools

Git, GitHub, VSCode, Figma, Postman, Antigravity IDE

Databases

MongoDB, SQL

Courses & Certifications

- ReactJS Course - Scaler
- Redux Toolkit - LinkedIn Learning
- NextJS Full Stack Crash Course - iNeuron
- Crash course on Python - Google
- Lyft Back-End Engineering Virtual Experience Program - Forage
